This is the letter I sent with the gun with personal and business information redacted: Sturm Ruger and .. I received an email from Ruger on the 4th of February informing me that they had received my revolver and they mentioned that their "typical response time is less than one week", so today, fifteen days in, I gave them a call. Provides two professional field strip & cleanings per year. Unlimited professional scope mounting & bore sighting during coverage. Provides warranty concurrent with manufacturer's warranty for the firearm, including all parts & labor for warranty repairs during coverage. We'll keep you informed of any recall notifications. Free packing/shipping to manufacturer &/or

manufacturer's authorized service center for warranty repairs (\$20-\$40 value). 15% discount on all customizing & elective gunsmith services and FREE shipping to The Gunsmith at Sportsman's Warehouse. Ruger New Model Super Blackhawk Bisley Hunter 44 Magnum 7.5in Stainless Revolver - 6 Rounds - Features a Bisley-Style grip frame, with longer, lower Bisley hammer. Patented transfer bar mechanism and loading gate interlock provide an unparalleled measure of security against accidental discharge. Patented integral mounts, machined directly on the solid-steel barrel rib provide a stable mounting surface for scope rings, eliminating a potential source of looseness and inaccuracy in the field (scope rings included). Models chambered in the powerful .44 Magnum, also accept factory .44 Special cartridges, which deliver superb accuracy and milder recoil. Ruger Super Blackhawk Standard 5.5" Revolver 6 RD 44 Rem M. Ruger Super Blackhawk Bisley Stainless 6.5" Revolver 5 RD. Please update your browser Your browser isn't supported anymore. Update it to get the best YouTube experience and our latest features. Learn more. You are going to think I am making this up but the exact same thing happened to me with the exact same gun if yours has the 6.5 inch barrel. Only 2 of

the 5 cylinder holes were too large on mine as a bullet would fall freely through cylinder without catching. Sent mine in and they called saying it was out of spec but they didn't have any more cylinders and told me to pick another pistol off their website and they would send it. I chose the SR1911 in 10mm and paid \$30 for the FFL transfer at my local gun shop. Best thing that ever happened to me as I like the 10mm so much I bought a second one to have a matching pair. Also, the 454 shot high and I had trouble finding a tall enough front sight replacement, and it was way heavier than I wanted. I doubt you will get your gun back. Ruger Super Blackhawk Hunter Stainless 7.5" Revolver 6 RD. - Get FREE Standard Shipping on Orders Over \$49 -. It's a custom, home-made holster our editor in chief made. Keep an eye out for an article about how to make one yourself. The assumption, of course, is that you'd only fire such potent loads when you really need that kind of horsepower. And in a dangerous situation, you'll be damn glad you have it. But for target practice or for more modest hunting and defense applications, you can safely shoot .45 LC and .45 Schofield rounds through a .454. Teddy Roosevelt once famously said, "Speak softly and carry a big stick." He meant that to reflect his style of foreign policy,

but that wisdom applies to hunters and outdoorsmen in the field, too. Especially when it comes to entering the habitat of critters that can hunt you as well as you can hunt them, it pays to carry a big stick—the biggest you can comfortably stuff in a holster, ideally. And when it comes to packing big wallop in a comparatively small package, a wheel gun chambered in .454 Casull is a surefire answer. Sure, there are a few larger cartridges available in handguns, but they come with a rolling chassis and a tank crew. Ruger, known for their rock-solid, built-like-a-brick-shithouse revolvers, offers a uniquely handsome handgun that you can comfortably carry while still supplying the staggering potency of the .454 Casull: the single-action, New Model Super Blackhawk Bisley. Sturm, Ruger & Co., Inc. is one of the nation's leading manufacturers of. Ruger Super Blackhawk Standard 7.5" Revolver 6 RD 44 Rem M. Pulling A Nooner: Why and How You Should Hunt At Mid-Day. A forum community dedicated to Ruger firearm owners and enthusiasts. Come join the discussion about optics, hunting, gunsmithing, styles, reviews, accessories, classifieds, and more! Ruger Bisley

Scrimshaw Ivory Polymer - Eagle with Flag. The difference between .38 spl and .357 is in length not diameter. The bullet isn't even fully out of the case yet when it hits the throat. In theory it should not make any difference as long as the bullet enters the throat straight. But, chamber dimensions do vary more than they should. A loose throat allows more room for the bullet to cant, maybe the .38 more because of the additional distance to reach the throat.

RD. When facing down a brown bear, I want the confidence of knowing it will fire whenever I need it to under whatever conditions I find myself in. Single-action trigger systems are less complicated and under less mechanical stress than double-action trigger systems. Ruger Super Blackhawk Standard Stainless 4.62" Revolver 6. More than one of them used one of Jim West's .45-70 guide guns though. You can't get the Ruger New Model Super Blackhawk Bisley from just any dealer. It's only available as an exclusive from the large distributor Lipsey's network of dealers. And fortunately, Lipsey's has a lot of dealers. In fact, the entire line of Ruger Super Blackhawk standard Bisleys available now is made up of Lipsey exclusives. As one of the top two of the nation's wholesale firearms distributors, Lipsey's has the leverage with manufacturers to collaborate on special limited runs of firearms which incorporate features not found on the standard offerings. They base these exclusives on, among other things, customization activity which reveals the features buyers most want for their guns. The objective of these exclusives is basically to help Lipsey's dealers sell more guns. By identifying and filling a demand for custom guns, they're reacting to what the marketplace wants. It's a great example of capitalism in

action. The Lipsey's Exclusives carry a slight premium over standard guns (\$9 in this case), but cost considerably less than having a standard gun customized. That makes it a win-win for buyers and sellers alike. Ruger Super Blackhawk Standard 5.5" Revolver 6 RD 44 Rem M. Ruger Super Blackhawk Bisley Stainless 6.5" Revolver 5 RD. Find Accessories for the Ruger New Model Super Blackhawk at ShopRuger.com: Ruger Super Blackhawk Bisley Stainless 7.5" Revolver 6 RD. Of note, just a few years ago, the number of persons documented defending "themselves" with a handgun against a bear attack in Canada and the continental U.S., could be counted on with the fingers of two hands, may be a few more now. Ruger Super Blackhawk Standard Stainless 3.75" Revolver 6. The range review was carried out with popular and readily available brands of ammo in both .44 special as well as .44 Remington Magnum. Fixed ramp front sight and adjustable rear sight. Next post: New Company Ritter & Stark Guarantees Rifles Shoot Half MOA or Better. rugged, reliable firearms for the commercial sporting market. With products made in America, Ruger offers consumers almost

800 variations of more than 40 product lines, across both the Ruger and Marlin brands. For almost 75 years, Sturm, Ruger & Co., Inc. has been a model of corporate and community responsibility. Our motto, "Arms Makers for Responsible Citizens,". I found the Ruger New Super Blackhawk Bisley when I was looking for a bear country sidearm. I prefer a three- to four-inch barrel in a field gun and have a love of Ruger single-action revolvers. None of the major manufacturers had what I was looking for so I thought, "Why not check Lipsey's." When I saw this gun, it was a no-brainer. It's just what I wanted. Especially with the Bisley grip. So if you have your eye on a particular gun, revolver, pistol or rifle, and there's something you're going to have to customize to make it perfect, check out Lipsey's Exclusives. If it's a popular custom gun feature, they just might have it. And if the Ruger Blackhawk appeals to you but you want a different caliber, grip, or barrel length than the gun we looked at today, check out the other Blackhawk models. They are terrific guns. To learn more, visit. Four Hunters in Montana Mauled by Grizzly Bear in Three. . Transfer bar mechanism and loading gate interlock provide an unparalleled measure of security against accidental discharge. I found that the Bisley grip suits me better than

the standard grip. It is all a matter of what suits you. Gotta love a Blackhawk in any shape form or fashion. The rear sight is fully adjustable for windage and elevation. That gives me enough time (I hope) to thumb back the hammer. Subscribe to our email list and get exclusive access to promotions, sales events and more!. New Model Super Blackhawk in 454 Casull & 480 Ruger. You can tell a Bisley by the sharper bend of the grip and the lowered hammer spur. The trigger guard is also a little more rounded. Sturm, Ruger & Co., Inc. is one of the nation's leading manufacturers of. Grizzly-Busting Snubbie? To enable the shooter to fine-tune point of impact, whether shooting light, fast 275-grain bullets or massive, deep-penetrating 400-plus grainers, the revolver is fit with an adjustable rear sight. The front is a serrated black blade. I will definitely replace my Blackhawk hammer with a Super Blackhawk

hammer once I can afford one yeah, I am that broke. For those of you who aren't bullet nerds, let me put that into perspective. Firing the .480 Ruger Super Blackhawk Bisley Don't get the impression that "comfortable to fire" means this pistol is a pussycat in the palm. Candidly, that phrase only applies in comparison to other powerhouse cartridges such as the .454 Casull, .460 S&W and .500 S&W. The .480 Ruger is still a handful. When shooting one- or two-handed in field positions, where the revolver leaps comfortably in the hands, the .480 Ruger feels great, leaving the shooter with an impression of massive authority at a very kind level of recoil. However, when you benchrest that same revolver for clinical accuracy testing and fire a dozen five-shot groups one after the other, your psyche quickly cottons on that this ain't a little featherweight cartridge. On the plus side, the grip is so comfortable and offers such an excellent handle on recoil control that, unlike even many .44 Magnums that I've tested, the .480 Ruger Super Blackhawk Bisley does not make my shooting hand begin to tremor or vibrate after firing a long series of groups— a dismaying effect I've regularly noticed when testing various big-bore handguns. During benchrest testing, I fired seven different loads. Here's a quick look: Three different loads— one each

by Buffalo Bore, COR BON and Federal Premium— utilized Barnes Bullet's outstanding 275-grain monometal XPB projectile. These are all excellent options for hunting deer-size game and for personal protection in black bear country. Ruger Super Blackhawk Bisley.480 Ruger front ramp sight (image courtesy JWT for thetruthaboutguns.com). Get a Full Year of Guns & Ammo & Digital Access. Now, if you're talking about the Ruger Factory hammers, Ruger was never out of them. I bought 2 Factory Bisley hammers from them within the last 2 months, and just ordered both a Bisley and an SBH hammer today - in stock. Please Update your browser for the best experience. I'm still learning. Hammer was 65.00 shipped. Live and learn. Get access to everything Guns & Ammo has to offer. At left is a.44 Magnum with a 305-grain bullet. On the right is a.480 Ruger with a 410-grain bullet. Both are cast of a very hard alloy and feature a broad, crisp-edged flat nose that maximizes trauma and deep penetration. This unique transition holster from the California style to the more popular Drop Loop can be found in the National Cowboy Museum in Oklahoma City. Notice the trigger guard area is not attached to back skirt- faster access to the grip and less stress on the stitching. Examples found in

Colorado and on page 129 of Packing Iron. With one line edge groove ~ \$124.95. With one line stamp add \$10. With basket weave or full tooling add \$49.95. Lining adds \$50. Available in any barrel length for any cowboy gun. The .475 Linebaugh is essentially a blown out, cut down, .45-70 Government cartridge. The .480 Ruger, then, is a shortened version of the .475 Linebaugh. You can make— and now I have made—.480 Ruger brass from regular .45-70 brass. Or you can just get the always exceptional brass right from Starline.

Garmin Tactix 7 Pro Ballistic Solar-Powered GPS Smartwatch: First Look. Time left Item Ending time: 20 Sep 2022 20:38:04 5d 7h Sep-20-22, 20:38:04 PDT. Non-lethal for Law Enforcement and Home Defense: Mission 4, TCR, MLR. All but one of the factory loads averaged 2.6 inches or less at 25 yards, and as you can see on the accompanying chart, four of the seven averaged less than 2 inches. That's excellent performance from a heavy-recoiling big-bore revolver. Predictably, point of impact varied a fair bit. From a revolver, very heavy bullets tend to hit higher than lighter, faster bullets that exit the muzzle fast before it has a chance to rise quite as much during early stage recoil. However, the adjustable rear sight made it easy to marry point of impact with point of aim. In a nice turn of events,

Buffalo Bore's 275-grain XPB and 330-grain Monometal Heavy Dangerous Game loads impact nearly the same at 25 yards, making for a great combo. My plan is to pack the lighter bullet for all-around work and the heavier, deeper-penetrating monometal bullet in big-bear country. At this time, the .480 Ruger Super Blackhawk only comes in Ruger's standard brushed stainless. That's a shame, as many will dream of a case hardened frame with a blued barrel and cylinder. As it is, the finish is just fine for a working gun. Get the top Guns & Ammo stories delivered right to your inbox every week. Review: Lipsey's Exclusive Ruger Bisley Super Blackhawk.44 Mag. The rear sight is also all black, and any kind of bright "U" notch would be appreciated. An upgrade, like Bowen's Rough Country rear sight, would go a long way to making the rear sight easier to see, as well as a bit more durable. That a pretty big hunk of lead moving really fast, and would be ideal for the largest whitetail, mule deer or wild pigs. 7. For semi autos- If you have an extended magazine or bumper pad at the bottom, it is your responsibility to let us know and you will need to send one of these into us for correct fit if we are making a magazine pouch for you. The same pattern as CH -1. This example has a tooled Double Line Lazy (S) Stamping from

an original in our private collection. With one line edge groove ~ \$124.95. With one line stamp add \$10. With basket weave or full tooling add \$49.95. Lining adds \$50. As photo with lazy (S) tooling add \$20. Available in any barrel length for any cowboy gun. The Super Blackhawk in .480 Ruger comes with an "over-sized" locking base pin. I put over-sized in quotations because that's what it's referred to, but it's absolutely necessary for a heavy recoiling revolver. I have noticed when shooting heavy .45 Colt ammunition (310gr at 1,200fps) the base pin will tend to walk forward towards the muzzle bit by bit. That becomes a problem. On the range, my own hand loads did best. I don't think I've ever found a revolver that doesn't like a big lead round with a wide meplat. Shooting off a front bag at 25yards, this round scored extremely consistent 2" five-round groups on average for four-shot strings. As the front sight blade is simply pinned in, an alternate can be easily made, if you so choose. There used to be a few options for drop-in replacements available, but they seem to be discontinued. The .480 Ruger was originally chambered just in the heavy double action Ruger Super Redhawk revolver, but the good folks at Lipsey's listened to customer demand and asked for the .480 to be chambered

in the comparatively lighter single action Super Blackhawk. These revolvers are now available only through Lipsey's distributors. (Prototype) Click on photo for larger view. If you are the lucky owner of one of these AUTOMAG.44 semi auto pistols with an 8 1/2 "or 6 1/2" barrel, you need one of these. 5. For antiquing and distressing add \$49.95 per piece.
