BMW was forced to make a series of recalls over the past week due to several different defects that affected newer and older vehicles and motorcycles. Photo (c) VMarin - Getty ImagesIt was a busy week for BMW of North America on the recall. A BMW is referred to as a beamer because it is slang that was developed back when BMW's only made motorcycles. However, most people don't realize that beamer is actually an incorrect term for the car, "Longer, lower, wider!" That was the American industry's design mantra for a very long time, and now, sadly, it's being adopted by the European marques that hav "Longer, lower, wider!" That was the American industry's design mantra for a ve. By Staff Writer Last Updated March 26, 2020. Now, the company is recalling another 106 of the vehicles because they were produced with incorrect front lower control arms. This could make it harder for drivers to handle and control the vehicles during operation, increasing the risk of a rollover crash. We set off in comfort mode and were struck by the car's incredibly smooth ride, even on the optional 19-inch low-profile footwear (the base 18-inch tires were even cushier but squealed more). This smoothness came at a cost of excessive float over dips and rises that seemed rather uncharacteristic of a BMW. We also found the new rack-and-pinion steering to feel somewhat inert and disconnected in comfort mode--not at all as in previous 7-series.
