Mohawk canoe forum. I'am new to this forum and would like some input regarding a solo canoe.. The seemingly

“slowest” canoe we own is a blunt nosed Mohawk . I've paddled a friends some. He uses it for canoe camping and paddles it with a kayak paddle. Pretty nice little boat. Jun

29, 2017. I have an opportunity to buy a 15' mohawk for 300 dollars. Seems to be in very good condition. The

person selling has no idea as to model. Aug 8, 2022.

Royalex hull, fully outfitted with foam saddle, thigh strap system, adjustable toe blocks, and air bags. The thigh strap system is standard . Feb 18, 2016. If you haven't yet,

search this forum for canoe threads - we have had quite a few lately and there have been many photos posted of the

various . NACT is a forum to buy, sell and trade QUALITY canoes.. Twin Cities Canoe/Kayak Trading Post. Mohawk

Canoe - boats - by owner - marine sale. Dec 2, 2013. Probe

12 solo whitewater canoe with Mohawk outfitting: Pedestal seat with thigh straps and foot pegs, air bags. Very good

condition. My husband and I brought our own kayaks and

no problem getting them in and bringing us back. The rest of our group rented canoes and we we're all able to stay .  
Manufacturers of canoe parts and accessories. Jul 16, 2011.  
Mohawk Intrepid 16 Canoe. Serial number:  
MMN361771280, built in 1980. Constructed of Royalex. The finish has oxidized, I spoke with Mohawk . I'm looking for a used solo boat for BWCA tripping. For reference, I have a Mohawk Odyssey that I use for river paddling (and a monster .. Flip it over and carefully run your bare hands over it, look for cracks and splits with some tactile feel! I didn't buy a canoe a few years ago because I felt a divot, upon investigation I saw it was pretty well cracked. Guy dropped it on a rock moving to the yard to sell it. Hey, best wishes to you on the exciting adventure! I am grateful for all the help I received on this board, and I'm sure they'll be as excited as I am to help you out! Paddle on! ~JP. This is tough canoe ready for whatever action you can bring its way. Come pick it up. Joined: June 15th, 2020, 8:48 am  
Posts: 15. Re: Looking for advice on my first solo canoe.  
Fast Easy to maneuver Great manufacturer Light weight  
Not well suited for Whitewater, but perfect for flat water to small shoals. Solo gives you amazing control. We had a relaxing time floating along the river. There were lots of

down trees to navigate (steer around) which was fun for my young boys. The river was clean and the raft and gear was in good condition. A 12' long canoe that is nearly 40" wide is going to be very slow. One of the (many) things I look at in a canoe is the length to waterline ratio. 12 feet is 144 inches, divided by 39.5 inches is 3.64. That is crazy low/slow. How do you find paddling the prospector 15 in the wind solo? And as far as lifting the blue at 45 lbs by yourself do you find it hard, is on/off the car tough? My current 17 foot prospector is just awkward i think at 60 lbs, but I can lift it and portage by myself(just is not that easy.

Thought at one time some models(Shaman) were available in a composite. Share this page on Facebook Share this page on Linkedin Share this page on Twitter. Length 12'7" Width 26.5" Depth at bow / middle / stern 21.5" / 15.5" / 21" Rocker at bow / stern 5" / 5.75" Weight 51lbs - This is very much an asymmetrical hull. The hull is quite narrow forward with firm chines (edges). The rocker and the hull shape shift right under the paddler. From the paddler's position aft the hull is much fuller and the bottom is quite

rounded. Leaning a bit forward and pressing a knee down engages the edges and lets the boat carve into turns. Leaning back slightly releases the edges and let the boat spin on the rounded after sections. Im currently looking at a Mohawk 174 used at \$350.It's either a canoe or a sit on top fishing kayak that Im looking at.With a canoe you can get the best of both worlds,camping,fishing,and touring.Only downside with a canoe is the weight,unless you buy a kevlar. Re: Looking for advice on my first solo canoe. View topic - Looking for advice on my first solo canoe. I feel like I cannot lose at that price. I was hoping somebody could identify and give an opinion on this canoe. Thanks. Joined: June 28th, 2001, 7:00 pm Posts: 2328 Location: Freeland, Maryland USA. Re: Looking for advice on my first solo canoe. Looks to be fiberglass with wood gunwales and woven seats. We noticed that you're using an outdated browser. Hey how's it going everybody? I'am new to this forum and would like some input regarding a solo canoe. I own a tandem Novacraft 17 foot boat in tough stuff right now, which I have tried to solo with some success but it's hard to manage a 17 foot by myself and portaging just plain sucks. So I have decided maybe a solo boat might be a good idea for me for when my wife can't go out canoeing or I just want to disappear into the woods to go fishing. I am thinking about getting a 14 or 15 foot solo boat but I have a few questions first for anyone that might own one. The first is that I plan on using this to get to remote back country and for me weight/ability to portage is a big key, as I will be going over bog/swamp, rocks and very thick woods

potentially. But the problem is the area's I plan on going are rocky flat water ponds, the shore lines usually have some jagged rocks. I also plan on using rivers to get from pond to pond, which are going to be mostly impassable so I would be dragging/portaging up rivers as well. So I really want a Kevlar canoe, something light for just me and maybe my dog(we are working on that one). How do you think Kevlar/aramid would hold up with lot's of rocks around or hitting them while on the water? My tough stuff canoe is still looking well, I have taken care of it and it's still in pretty good shape so I think the Kevlar would be fine. Also what weight do people find a 14/15 foot canoe comfortable to portage, is a heavier more durable material still be manageable to portage? I wondered about the hull material as I don't believe Mohawk ever used anything but Royalex and R-84 (a lighter version of Royalex). That is one of the big resins they no longer make boats and just sell parts now. I know it will serve you well. Re: Looking for advice on my first solo canoe.. . Since I no longer have the boat in front of me I will have to try to remember the cracks. The first time it started cracking it was slight but you could tell that's what it was. I did as Mohawk suggested and purchased some West System epoxy and fiberglass cloth. I

couldn't get the 10oz they recommended so I got the 7oz. I put a patch in the stern and the bow just about where they start to turn up. The patches were slightly larger than my palm. Two layers, the last one about a half in bigger than the first. The next time I checked the stern had cracked all the way through the patch and into the foam. I patched again with larger patches. By now I had a crack starting in front of the seat and one about five inches in front of the stern patch. I have a picture that shows the stern crack. I blew it up to an 8x10. If you are at the Nantahala this summer I will be glad to show it to you. I believe Mohawk says one of the cracks is 14 inches long. The picture shows it was only 8 inches at this time. So they have continued to grow, even after patching as they instructed. The major ones are down into the foam. I was able to see that the abs material at that point was thin as a few sheets of paper. I really don't think that is enough abs in that area for a whitewater boat. I'd just like to hear the final outcome since this seems to be one of those learning experiences in life I would rather not live through. It looks like Kevlar in the photo. Either way at that price it like others said don't wait. I learned to paddle in a Mohawk four decades ago. I am not attacking you, just confused with the information you are

providing contrary to what I have understood about Mohawk for many years. We do not have flamefests on this messageboard and I am not trying to start one. When you post here about a problem you have with a boat manufacturer, your accuracy is what helps. Reading Mohawk's response about your communications with them has shed a different light on this matter you did not show. What's up with that? No Dealers I believe Mohawk only sells direct to the customer so there is no dealer markup but you do need to figure the shipping cost into your final boat price. Their white water boats are great but I have no experience with their fiberglass layup boats. Another point of interest is that their outfitting store shows the final price that includes shipping. I wish more online stores would do that. I was just looking at the classfiveboats website where they make Mohawk fiberglass canoes and I have got admit, for fiberglass boats their prices are great! I mean, as low as \$635 for a 17'4 75 lbs boat that's incredible!!!. That Odyssey has kind of a tug boat aesthetic. Looks tough. Looks to be fiberglass with wood gunwales and woven seats. But these are my thoughts and I respect yours!. Had it out last week on the Bois Brule in northwest WI. I have an opportunity to buy a 15' mohawk for 300 dollars. Seems to

be in very good condition. The person selling has no idea as to model. Peter I'm interested to hear more about the clipper viper. I would guess it is durable and stiff, maybe not so light? Powered by Discourse, best viewed with JavaScript enabled. It looks like a nice boat, and the price is right, don't over think it, just enjoy it. Currently in the bed of my truck. Haha nice try. I just bought a Mohawk 174 fiberglass. It's a bit on the heavy side (around 80-90 lbs) but moves pretty good IMO. I'm gonna moor it for the season at a local lake so I don't have to keep loading it up on my Jeep Patriot. I also have a Sun Dolphin Journey 12 sit on top fishing kayak (I'd rather a Hobie) which only weighs 58 lbs, much easier to put on my vehicle. I'd rather a lightweight canoe in Royalex, but I have no complaints with the one I have. Bought it used for \$350. I hope to get up to the Adirondacks possibly this summer or September, or down to North Carolina near Nags Head where my sister lives. There I would bring my kayak not my canoe. Not a top of the line type canoe, but it should be serviceable with a roadside launch point if you don't expect a lot of performance. For fishing, short camping trips or the like, it would be fine. Probably rather heavy, so portaging to remote places in the woods is out for this boat. I was wrong

about the gunwales and seats. The picture was deceiving. Seems the gunwales have some type of vinyl or plastic cover and the seats are plastic with aluminum supports and the thwarts are aluminum. Still feel like I got a good deal. Was from the YMCA only used in their pool to practice paddling. Not kevlar. Royalex. Very light. You got a GEM of a canoe. I can't imagine you're not tickled pink. Please let me know if you're not. Finally, you bought the boat from a dealer whom you trust. Trust in a retailer is great. When I have trust in a place where I spend my money, I continue to go back and spend more. However, I have not seen where Mohawk sells directly to retailers. According to Mohawk, you buy their boats DIRECTLY from them. What's up with that? Bad Little Falls, Flint\_2016, Early Man and 4 others. I looked all through their literature on the internet and all the printed material that I could find and they don't mention a warranty. I am finding out now that they don't warranty their boats. They picked mine up at Nantahala during the Spring Splash. Now they say they won't replace it. They are threatening not to even bring it back to the Nantahala during GAF. Have you ever heard of such? Looks to be fiberglass with wood gunwales and woven seats. It says they use 2 layers of fiberglass. Is that standard for other

companies??. Drag it right in the NOC retail shop during a Saturday afternoon when it is packed with people. Point out the flaw to the manager. You will get an exchange.

Currently in the bed of my truck. Haha nice try. BTW, if you think having an ABS boat crack on you is a pain, own and paddle a glass boat. -----

I don't see how they can make quality hand-laid fiberglass canoes at the prices on their website unless they're using convict labor. Like @Scotchmon I have a Solo 14 I picked up used some years back. It has been a great boat for me, no issues. I have had other canoes that tracked a little straighter or were a little faster through the water, but I use this one more than I used the others as it is versatile and fairly light. My Sun Dolphin Journey 12 SS(12') Not the best but it gets me out on the water.. Jun 25, 2006 · If you check the weight of the Roylex canoes they have vs. the same size of Roylex canoe other top manufactures have you will see that the Mohawk is about 8 to 10 lbs. Aug 14, 2020 · Why? The Mohawk Canoe website links to Class Five Boats for their fiberglass

canoes. So clearly Mohawk approves of all this. No funny business. It seems to me more of a. AdShop Canoes at L.L.Bean. Free Shipping With \$50 Purchase. Aug 07, 2019 · I am new to these forums. Can anyone tell me the model of canoe I have? A guy in my hometown is moving and wanted to unload it fast so he sold it to me for \$175. It is. Mar 09, 2012 · Take the green one, put the black perception saddle in it, put metal deck plates on it and you have my first white water canoe. I believe it was called "Whitewater 16" by Mohawk.. by Discourse, best viewed with JavaScript enabled. He posted the same thing over at paddling.net, and Mohawk's reply seems to be a cut'n'paste jobby too. Good conversation and questions for Willy on there, and he hasn't been back to answer then anywhere, it looks like. Haven't checked the NPMB yet, but I think it's likely that there's a thread over there, as well. RECLAIM the Southeast Esquif a bunch of canucks are killin down here Customer Service Get some Rippers Back in your Boats Its amazing how much media can do these days with the internet Make a plastic boat Also make a c1 saddle like the old dagger pedestal. Thousands of Mohawk canoes have been bought and used by recreational and sports boaters throughout the years. Owners of these canoes claim that they offer the best value at affordable prices. Will a Mohawk Canoe really give you the best value for your money? Solo 14 R84 14' 29 / 30.25" 1" 12.5" 19" 39 lbs. 375 lbs. I looked all through their literature on the internet and all the printed material that I could find and they don't mention a warranty. I am finding out now that they don't warranty their boats. They picked mine up at Nantahala during the Spring Splash. Now they say they won't replace it. They are threatening not to even bring it back to the Nantahala during GAF. Have you ever

heard of such? Just being willing to try is half the battle. Good move! Happy to see you got the boat!. If you want a great canoe, buy it. If it's within 200 miles of NC I'll buy it. I have a 13 ft Mohawk single. It weighs 39 lbs and is tough as nails. It's worth 1500. I can make you a deal and even hook you up with the ABS to fix it. Personally, I've had no problems with Mohawk - products or service. My Viper has some cracks and splits, but that is because I paddled the living daylights out of it for about 5 years before letting it retire. Speaking of which, anybody interested in a Viper? My Shaman was bought new on 15 December 2001. I bought it from Troublesome Creek Outfitters. Doug Shumate told me the canoe had been kept inside his store the whole time. It looked like it had to me. You are more than welcome to contact Doug at [www.troublesomecreek.com](http://www.troublesomecreek.com) and get collaboration of my story. I have bought a lot of things off of Doug and highly recommend him for all your paddling needs, short of a Mohawk canoe. I am pretty sure Mohawk knew this because Doug had done the talking and arranged for me to bring the boat to GAF. Just paddling and watching long-term results isn't enough. Some, like me, just aren't hard on boats no matter what rivers we paddle. Flip it over and carefully run

your bare hands over it, look for cracks and splits with some tactile feel! I didn't buy a canoe a few years ago because I felt a divot, upon investigation I saw it was pretty well cracked. Guy dropped it on a rock moving to the yard to sell it. Solo 13 R84 13' 29 / 30.25" 1" 12.5" 18" 36 lbs. 300 lbs. A much improved Roylex would be the second choice to makin tupperware boats. I have a Dagger Quake you can't kill, and all my Esquif plastic is still going strong. Polaris Jet Ski Models [Review of Polaris 650, 750, 785,. . . It looks like a nice boat, and the price is right, don't over think it, just enjoy it. These models gained canoe lovers' support because of their high performance and the attention to detail that the company provided. The Solo 13 weighs only 40 pounds and has an overall length of 13 feet. You can easily carry it upstream. This canoe also tracks well, even if it is just a small boat. It also very maneuverable and can handle pleasure boat wakes and bass with ease. Discover the ultimate pleasure in canoeing: Solo paddling in a Solo 14 by Mohawk Canoes. Decked Canoes, Open Canoes, as long as they're canoes!. Apparently, McCrae and I think enough alike to both have sent Mohawk info on deceased guidebook author Roger Corbett, who used to paddle an Intrepid 16. And one from the Slippery Rock Creek, Western

PA:. They don't make canoes anymore, but there is still a Mohawk Canoe company. The guys that run it are asking Mohawk owners to share memories of their canoes on their website. So, if you have a Mohawk, you might be interested in having your canoe's photo posted and telling its story. Here's the link to their show us your Mohawk page, where you can find instructions for emailing your Mohawk's story. Those who have bought and used Mohawk canoes claim that they are good canoes with good accessories and are supported by good service. Owners of these canoes are not afraid to recommend them to others. They also say that these canoes offer the best bargain for entry-level canoers. I just bought a Mohawk 174 fiberglass.It's a bit on the heavy side(around 80-90 lbs)but moves pretty good IMO.I'm gonna moor it for the season at a local lake so I don't have to keep loading it up on my Jeep Patriot.I also have a Sun Dolphin Journey 12 sit on top fishing kayak(I'd rather a Hobie)which only weighs 58 lbs,much easier to put on my vehicle.I'd rather a lightweight canoe in Royalex,but I have no complaints with the one I have.Bought it used for \$350.I hope to get up to the Adirondacks possibly this summer or September,or down to North Carolina near Nags Head where my sister lives.There I would bring my kayak
