SECTION 6.0 Page 26 of 44 SAFETY MANAGEMENT

Protecting the Customer From the founding of VOLVO in the 1920's, quality and safety have been core values of the corporation. Since that time, the continued commitment to the research and development of new and often unique safety solutions has made the VOLVO name synonymous with safety around the world. Today, Quality, Safety and Care for the Environment continue to be the core values of the organization and form a foundation for all business practices including the cooperation between VOLVO and our suppliers. The VOLVO definition of safety not only

includes the safety of the immediate user of our products, but also understanding the entire scope of potential impact of our products on society. The primary objective is to develop products that assist in preventing accidents from occurring or, in the event an accident does occur, to minimize the consequences for the drivers and others on the road. The supplier's contribution to safety lies in developing innovative solutions, implementing safety features and producing fully conforming products. The VOLVO safety management program focuses on both the suppliers' management systems, and product quality related to safety.

Traceability Safety Management Audit Production Requirement This change in the review rules will be effective from the 1st of September 2022. This means that after this date, datasheets sent to Volvo Cars that do not comply to the new review rules will be rejected.

SAI Global Webinar: Deep Dive - BRC Food Safety Issue 8. Supplier Quality Assurance Engineer with 3.7 years experience. Currently, no check is made whether the recycle questions are answered or not when reviewing a datasheet. Effective from 1st of September 2022, you must answer the recycle questions with 'yes' or 'no' for all materials weighing more than 5g. The rules are applicable for materials under the material categories 1.x, 2.x, 3.x, 4.x, 5.x, 7.1, and 7.2. If answering 'yes', values must be entered into the '% of recycled content' fields. If answering with a range, that range may not exceed 20%. We would like to inform you that we are introducing new review rules for IMDS datasheets. Those are about submitting recycled content information for certain material categories.

In order to track and follow up on both legal regulations and Volvo standards regarding substances of concern, material declarations are requested for new and modified parts. The reporting of material data sheet (MDS) declaring the material and substance content of a part is done in IMDS (International Material Data System). Read more here. After passing the initial screening, you will be enrolled in a Supplier Evaluation where you must comply with our Key Elements Procedures (KEP). They are requirements that spans over all supply types. As part of our commitment to limiting and influencing environmental

impacts from maritime transport, Volvo is a member of Clean Cargo forum, where major brands, cargo carriers, and freight forwarders are dedicated to reduce environmental impacts of global goods transportation and promoting responsible shipping. For the same reason, road transport suppliers are encouraged to comply with our engine class requirement. Learn more about the sourcing process at Volvo Group with these frequently asked questions:.

In our vision to become the most desired and successful transport and infrastructure solution provider in the world, we therefore need all Supplier's full commitment to support us on this sustainability journey through the care they invest in the parts, components and services they offer, produce and deliver. The Volvo Group has high expectations of its suppliers. We require responsible business principles as outlined in our Code of Conduct and based on our values where customer success is key. Quality is more than quality assurance as the supplier must take responsibility for the effect on the environment and also take a holistic view of material handling and information exchange. Our suppliers need to actively contribute to reducing environmental impact and deploy ethical standards throughout the supply chain. Supplier Information Portal. This portal provides

information for suppliers potentially conducting business with Volvo Group. On this site you will find information regarding the transformation as well as a number of tools to help answer any of the questions you may have. To achieve the Volvo Group's vision to be the world's most desired and successful transport and infrastructure solution provider, we place high demands on our suppliers. We expect products and services to be of top quality, and we expect good management from all our suppliers, including the lower tier ones. The Volvo Group Code of Conduct is clear about our commitment to compliance, including anti-corruption, competition law, sanctions and other issues that influence how we do business with suppliers. Our compliance with these requirements helps increase our business opportunities and serves as a tool for exceeding the expectations of current and future suppliers. Strive for continuous improvement and customer satisfaction, while maintaining high standards. The Volvo Group actively strives to eliminate harmful substances from the products and we therefore require that our Suppliers follow the Volvo standards regarding Substances of Concern, the Volvo Red list, Volvo Black list and the Volvo Grey list. When shipping products to any country outside your own, as a supplier you

are responsible for calculating the Regional Value Content of your products. You will be required to submit a Certificate of Origin for goods annually, as well as with each shipment in regions where this is required. Information on our various trade agreements can be found via the links below. After passing the initial screening, you will be enrolled in a Supplier Evaluation where you must comply with our Key Elements Procedures (KEP). These are requirements that span over all supply types. You can find them in the download section below. They should deliver state-of-the-art quality with perfect precision right through the supply chain, from project planning and in production facilities right through to delivery to our plants and customers. We also expect our aftermarket suppliers to compete with offerings for a complete product life cycle that minimize vehicle off-road time, and to offer a service level that supports our zero incident promise to customers. Deliver on time and in the correct quantities in order to shorten lead times. If successful, and provided we have a need for sourcing components or services that match your company capabilities, you may receive a Request for Quotation (RfQ). As a member of Drive Sustainability and in line with general automotive industry practices, the Volvo Group uses a self-

assessment approach to evaluate supplier performance and compliance with our sustainability requirements. The Volvo Group works with compliance partner NQC and the Supplier Assurance platform (www.supplierassurance.com) in order to facilitate collect and evaluate your input to the SAQ. If you pass the initial screening of potential suppliers, you will be contacted by Volvo Group Purchasing to further evaluate whether your company profile corresponds to Volvo Group requirements.
