Human resources information system (HRIS) solutions help businesses manage multiple facets of their workforce operations. They provide a central platform for human resources professionals. If you're looking after a loved one who is experiencing shingles, keep your distance from

anyone who has not had chickenpox or been immunized against it. The CDC states that most adults are not at risk of contracting chickenpox from a person with shingles, as more than 95% of adults have been exposed to varicella zoster. However, it's important that TEENren be vaccinated and infants be protected from exposure to the virus.

Shingles typically presents as a painful, red rash on the back or chest. Often, the shingles rash occurs in a stripe-like pattern known as a dermatomal distribution. This happens because the virus lies dormant in nerve tissue near the spinal cord.

### What PET Scans Do

PET scans are used to show a number of things inside the body, including:.

- The droplets can land on surfaces and remain active there for several hours. They tend to survive longest on hard surfaces like stainless steel and plastic, and they don't remain active as long outside your body when they land on fabric or other soft surfaces. If you touch an infected surface and then touch your nose, eyes or mouth, you might infect yourself with flu germs. The most common way to contract the flu, though, is by inhaling droplets from an infected person's cough or sneeze.

### Expedia, Hotels.com and Travelocity: Which is Best for Hotel Reservations?

Another hallmark of the flu is a fever, meaning your body

temperature is over 100.4 degrees Fahrenheit. This is another symptom that's common in the earlier stages of the flu, and it's often accompanied by chills that cause you to shiver. You may also feel extremely tired, and this fatigue can come on quickly. While you're this exhausted, you may find it difficult to engage in your normal daily activities.
