And like I mentioned earlier, a lot of these overlays are of really good quality so it's not like you will be losing quality. I'm 1-5 with attempting to stream with this app. I haven't found the bandwidth "sweet spot" yet and unfortunately the app doesn't let you know if you're

there. I've had 3/4 bars of service and my FPS and KBPS bounce all over the place. If you're losing frames it does not alert you and if you don't have any audio coming through it does not tell you. There is no way to test your bandwidth prior to going live. With that said, your only option is to promote your stream like normal, go live, cross your fingers, and hope that the app can hold it's own and if it doesn't hope that one of your friends is nice enough to text you to let you know that your live stream is completely useless. Pretty bummed that I spent \$150 on the premium version of this app just to have to constantly close it out and resort to going live on Instagram instead. I don't have enough faith in it at this point to click "go live" anywhere outside of my home which is the point of the app. Try streaming for about a month and then decide if you will be sticking around or if streaming was just not all it is cracked up to be. Streamlabs makes popular livestreaming software to help content creators. Recently, it announced multistream functionality. This allows you to stream simultaneously to Facebook, Twitch, and YouTube. You can download Streamlabs on the developer's website.. . For someone already used to streaming, going live on multiple sites is a cinch. Whatever streaming software and sites you

choose will have specific steps, but here's the overall gist. Set up accounts on platforms that support live streaming. Jowi finished a university degree with related units in journalism in 2012. But even before he stepped into university, he's been known by his friends and family as the go-to person when anything computer-related requires explanation. After linking your accounts, press the "Go Live" button to bring up the "Go Live" window. From here, you'll be able to toggle which platforms you'd like to stream to. New to streaming! I use SLOBS, and I was wondering whether or not multistreaming taxes my pc more or if they handle the burden?
