We must un-calculate the wall thickness from the outer dimensions, 3/4" (or three quarters of an inch for the metric thinkers. The little dash dashes are the symbol for an inch, not misplaced accent marks to make the pronunciation of the vowel A into a different A sound. To make the math easier on a calculator, we convert the fractions of an inch to a decimal equivalent, the true

superiority of the Imperial system starts to show, dividing 3 by 4 to get— 0.75") wood being the most common thickness for enclosures. Our above box, 13H x 32W x 10D would need 1.5" taken out per dimension, leaving 11.5H x 30.5W x 8.5D, representing the dimensions of the airspace residing in the enclosure. The manufacturing is very high quality. Makes my 4 - 8" DVC subs bang. Highly recommend. (4) 10" or (2-3) 12" or (1) 18". Skar Audio Dual 12" 5000W Loaded EVL Series Vented Subwoofer Enclosure. Shows what's inside. Item often ships in manufacturer container to reduce packaging. If this is a gift, consider shipping to a different address. Looking for Misc Audio Deals of the Day?
