Here are other topics featured in this episode: Remove the dash panel to which your 12-volt outlet secures. In general, you need a Phillip's screwdriver and/or a socket set to remove the plastic panels on the dashboard. Every make and model uses a slightly different process for installing the dash panels. If necessary, refer to the vehicle repair manual for your vehicle make and model if the bolt locations for the dash panel are not easily located. National 401(k) Da: What's the Maximum Amount You Can Contribute to a 401(k)?. Pilots are already under way at utilities in Missouri and Pennsylvania, as well as in several non-U.S. countries. Federal regulators have given a preliminary blessing to the technology (though the Federal Communications Commission is still investigating whether power line

communications could cause radio interference). And utilities and ISPs such as Earthlink have shown interest. Larger scale commercial rollouts should begin later this year. Success, however, isn't a guarantee. John Joyce, CEO of Ambient, a maker of power line communications equipment that has development deals with utilities ConEdison and Southern Co., says the business model for power line broadband is still being hammered out. Rather than shouldering the whole load for necessary infrastructure upgrades, for instance, utilities are looking for partners such as ISPs to cover some of the costs. Pricing will also be a key issue. "The number that's thrown out is \$29.95 [per month]," Joyce says, compared with around \$50 a month for cable or DSL service. At that price, the outlet in your wall may become your latest window on the world. More information is available from the United Powerline Council (www.uplc.utc.org) and the Power Line Communications Association (www.plca.net).
